

Hi EYE

POLECAM

Introducing the specially modified Toshiba IK-HR1S camera and 5 megapixel fish-eye lens exclusively brought to you by the POLECAM engineering team.

This creates the ultimate lightweight, super compact and cost effective stadium camera system solution.

It provides a 170° panoramic / fish-eye view of an entire room, stadium or event removing the need for a pan & tilt unit.

FEATURES

The Toshiba IK-HR1D or S Hi Definition colour video camera along with a Polecam 5mp 170° fish-eye lens is an ideal compact high definition system for capturing many broadcast panoramic images for broadcast.

Camera, base plate and lens weighs only 234 grammes
- less than the weight of a coffee mug!

Order the camera and lenses or a complete system. (Choose from bracket, housing, cables, remote control panel and portable recording device).

The POLECAM Remote Control Panel (RCP) can control up to five cameras from the one panel .

No operator required, just the all-important engineer.
