

CARBON FIBRE POLES

STIFFER, STRONGER, MORE CONTROL!

It's all in the weave! Polecam's new de-classified mil-spec carbon fibre gives you more control for the same size and shape with a tiny increase of weight (approx 24 grams per pole).

Increased weave density of 30%.

Fits onto all Polecams without any modifications.

Features

- Stiffer, stronger and more flexible.
- Fits into the standard Polecam bags so nothing extra to carry.
- Gives even more flexibility and shooting possibilities.
- Stiffer poles allows greater control of the Polecam and an improved feel for the operator.
- Increased vibration absorption properties.
- More control at longer lengths.
- Supplied as standard on all Polecams.
- Should not be used mixed with old Carbon Fibre.

Weights & Measurements

- OD - 41.5 cm
- Overall Length 1.25 metres
- Reach Length 1.12 metres
- Weight - 456 grammes
- Weight Holey Poley 416 grammes

POLECAM

Polecam Extends It's Reach

Not satisfied with a 6 metre crane?
Upgrade your Polecam from a 6
metre crane to an 8 metre crane with
the addition of two extra poles.

Advanced design carbon fibre that is
stiffer and stronger.

Rig still packs down into two bags.

Features

- Simple upgrade – just replace your poles.
- Fits into the standard Polecam bags so nothing extra to carry.
- Gives even more flexibility and shooting possibilities.
- Stiffer poles allows greater control of the Polecam and an improved feel for the operator.
- Same vibration absorption properties as before.
- Reach even further than before adding even more production abilities to your rig.
